About the awards

The Client Choice Awards recognise best practice in the professional services sector and are based solely on client feedback.

Now in their 20th year, the awards reward firms in Australia and New Zealand for their excellent client service, expertise in clients' areas of need, innovation and superior client experience. These are the only multi-profession and fully client-judged awards anywhere in the world.

Key facts:

- This is the 20th annual Client Choice Awards
- Over 16,000 pieces of client feedback were collected
- 250 firms entered this year
- There are 59 categories across the professions

There are no panels, judges or self-nominations, only client ratings that are independently researched and benchmarked by Beaton Research + Consulting.

Every year Beaton conducts a large-scale market study and surveys senior decision makers and users of professional services to understand how firms are performing. Up to 190 data points are collected from each respondent, creating the most comprehensive dataset of its kind.

Using Beaton's suite of actionable reports and expert advice, entrants into the awards can use their client feedback data to drive their strategic priorities and investments.

Thank you to all the firms that support these awards year after year.
